DEAR VOTERS,

“Tradition is not to preserve the ashes but to pass on the flame”.

Creative talent and initiative have always influenced people and enterprises in our country. However, nothing new has ever been achieved without its meaning and purpose having been thoroughly assessed.

The liberal-conservative government of Baden-Württemberg has staggered between dogged pursuit of out-dated concepts and blind belief in progress. The liberal-conservative government has no ideas and governs aimlessly. It is time for courageous and forward-looking action. We need a politics for and with the people and not against them.

The state elections are on 27 March. The time has come for change, for new ideas and for a new political direction that sets Baden-Württemberg up for the upcoming decades. Together with you we would like to take on this challenge.

W. Kretschmann

Winfried Kretschmann

Top-candidate of ALLIANCE 90/THE GREENS Baden

1. GREEN ECONOMIC POWER

Promote manufacturing that conserves resources, boost climate and environment technologies and champion strong environmental protection. We want to modernize our economy ecologically so that our enterprises keep playing a leading role in the global market.

Sustainable mobility is the future of the automotive industry. Crafts and small firms play a central role in the shift towards sustainable energy supply. Right now a lot of enterprises are on the way towards these growing industries. Green politics supports them.

2. NEW JOBS AND GOOD WORK

A vote for the GREENS is a vote for new jobs – today and tomorrow. With the Green New Deal we will create jobs in the engineering sector, in green and energy-related technologies and in the IT industry, in the childcare and healthcare sectors. We want to establish minimum wages and lower social insurance contributions for lower earners.

3. THE BEST EDUCATION FOR EVERYBODY

To provide a fair chance for all children, we want individual support, good full-time and collective schools in order to overcome the tripartite school

system where it is needed. A school reform which is directly related to regional concerns initiates the establishment of a new school culture. We will abolish the unsocial tuition fees and improve the conditions for studying.

4. SUPPORT THE YOUNGEST

Crèches, daycare centres and after school day clubs – for a good education from the beginning and for the best standards for all children. Parents need to find good childcare in order to have the choice to go to work with a good conscience.

5. GET AHEAD TOGETHER

Whether you come from the Alb or from Turkey, everybody's contribution is needed and we are stronger together. Everyone should have the right to live according to their will. Society should give those who are in need a helping hand: at the start of careers, to care for parents or to start a family. We want healthcare to be located near towns and in the countryside for old and young people.

6. TAKE PART AND CO-DECIDE

Let's push for more democracy and a new political approach! We want to make politics transparent, facilitate referendums and let citizens actively take

part. So they can have a direct say in decisions on large-scale projects and debatable proposals.

7. MOBILITY IN THE ENTIRE STATE. NO S 21

We entirely disapprove of Stuttgart 21. The alternative "Kopfbahnhof 21" is cheaper and more efficient. However, it should be left up to the citizens to make the decision by referendum. We want an improved bus and train infrastructure across the state and an increase in rail transport for freight. The Rheintalbahn needs to be expanded in a socially and environmentally-friendly way. We should therefore not blow billions on one nonsensical prestige project.

8. REGIONAL FOOD

Organic farming offers the best economic perspective for our small-scale agriculture. Organic farming preserves nature and supports our cultural landscape. More and more local restaurants place an emphasis on serving seasonal and regional food - this way agriculture, local restaurants and tourism work together. We want to make Baden-Württemberg 100% GMO-free.

9. NEW ENERGY INSTEAD OF NUCLEAR

Extending the contractual life span of nuclear power plants is wrong-headed. Instead of stockpiling nuclear

waste, we want to promote energy-saving, energy-efficiency and renewable energies. By 2050 we want 100% clean energy generated through water, wind and sun for Baden-Württemberg. By doing so, we will save the climate and ensure a sustainable and secure supply of electricity. Let's make Baden-Württemberg a front-runner in green technologies!

10. DEFEND FREEDOM

Everybody should be given the opportunity to blossom in an open-minded and tolerant society - safe, free and without fear. We want strong human rights instead of a big brother approach to surveillance - on the internet as well. Discrimination on the grounds of origin, gender, religion, age or sexual identity is not acceptable.

11. SOLID FINANCES

We have a duty to leave our children and grandchildren a legacy of sound public finances. CDU governments produced debts, even in good times. We GREENS stand for a solid financial policy. The state has to ensure that municipal authorities remain financially sound and capable of acting. However, the federal state also has a responsibility to ensure that those most capable of contributing pay a fair portion of taxes.
